

# Probation and Parole in the United States, 2022

Danielle Kaeble, *BJS Statistician*

An estimated 3,668,800 adults were under community supervision at yearend 2022, a 1.0% decline from the 3,705,500 who were supervised in the community on January 1, 2022 (**figure 1, table 1**).<sup>1</sup> This decline is due to a decrease in the number of persons on parole, who made up 19% of the community supervision population. The number of persons on parole fell from 745,300 to 698,800 (down 6.2%) during 2022. The probation population remained relatively stable during 2022, with a 0.3% increase from 2,981,500 to 2,990,900.

Findings in this report are from the Bureau of Justice Statistics' (BJS) Annual Probation Survey, Annual Parole Survey, and Federal Justice Statistics Program, which collect data on adults placed on correctional supervision (entries) or removed from supervision (exits) during the reporting year and on characteristics of the population at yearend. These are the only national data collections that cover community corrections in all 50 states, the District of Columbia, and the U.S. federal system. Findings focus largely on changes in the community supervision population within a given year

<sup>1</sup>The community supervision population includes adults on probation or parole, but excludes those adults on both probation and parole to avoid double counting. See *Methodology*.

**FIGURE 1**  
Adults on probation or parole, 2012–2022

Note: See table 1 for estimates. Details may not sum to totals because the community supervision counts were adjusted to exclude the yearend number of adults on parole who were also on probation. See table 9 for counts of adults on parole who were also on probation.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2012–2022.

to minimize the effect of factors such as administrative changes or reporting differences.

For this report, an adult is defined as any person subject to the jurisdiction of an adult court or correctional agency. Reporting methods for some probation and parole agencies have changed over time, resulting in changes to previously reported statistics. (See *Methodology*.) Appendix tables 5 through 13 present additional 2022 data on probation and parole.

## HIGHLIGHTS

- At yearend 2022, an estimated 3,668,800 adults were under community supervision (probation or parole), down 36,700 (1.0%) from January 1, 2022.
- From yearend 2012 to yearend 2022, the total adult community supervision population fell 23%, from 4,790,700 to 3,668,800.
- The probation population stayed under 3 million for the second year in a row in 2022.
- During 2022, the number of persons on parole declined from 745,300 to 698,800 (down 6.2%).
- Entries to probation increased 10.7%, from 1,419,300 in 2021 to 1,571,500 in 2022.
- The parole population decreased in 36 states and the District of Columbia during 2022.

## Population of adults on parole decreased 6.2% during 2022

From yearend 2012 to yearend 2022, the total adult community supervision population fell 23%, from 4,790,700 to 3,668,800 (table 1). The number of adults on probation declined by almost 1 million (954,000) from 2012 to 2022. This is the 15th consecutive year of decreases for adults supervised in the community.<sup>2</sup>

The probation population in 2022 increased by less than half a percent (0.3%) (figure 2). This is the first increase in the probation population since 2008 (not shown in tables).

In 2022, the parole population had its second largest recorded annual decrease (down 6.2%) since 1980, when BJS started collecting probation and parole information on a yearly basis (figure 3). The largest decrease was recorded in 2021 (7.1%).

<sup>2</sup>For 2010 and earlier data, see the *Probation and Parole Populations* series at <https://bjs.ojp.gov/data-collection/annual-probation-survey-and-annual-parole-survey>.

**TABLE 1**  
Adults under community supervision, 2012–2022

Year	Total	Probation	Parole*
2012	4,790,700	3,944,900	858,400
2013	4,749,800	3,912,900	849,500
2014	4,713,200	3,868,400	857,700
2015	4,650,900	3,789,800	870,500
2016	4,537,100	3,673,100	874,800
2017	4,508,900	3,647,200	875,000
2018	4,399,000	3,540,000	878,000
2019	4,357,700	3,492,900	878,900
2020	3,890,400	3,053,700	862,100
2021	3,745,000	2,963,000	803,200
2022			
January 1	3,705,500	2,981,500	745,300
December 31	3,668,800	2,990,900	698,800
<b>Percent change</b>			
2012–2022	-23.4%	-24.2%	-18.6%
January 1, 2022– December 31, 2022	-1.0%	0.3%	-6.2%

Note: Counts are rounded to the nearest 100. Details may not sum to totals due to rounding and because the community supervision counts were adjusted to exclude the yearend number of adults on parole who were also on probation. See table 9 for counts of adults on parole who were also on probation. Estimates are based on the most recent data available at the time of publication and may differ from previously published statistics. Reporting methods for some probation agencies changed over time. See *Methodology*.

## Probation population increased in 28 states and the District of Columbia during 2022

Probation populations rose in 28 states and the District of Columbia during 2022, with a total increase of 60,800 adults under probation supervision (table 2). Texas, Georgia, Maryland, Arizona, and Virginia had the largest increases, with a combined increase of 39,000. These five states accounted for almost one-third (31%) of the total probation population.

During 2022, the probation population decreased in 42% of jurisdictions, compared to 62% of jurisdictions in 2021. Minnesota had the largest absolute decrease in persons on probation during 2022 (down 14,100), with the probation population also decreasing in 20 other states and the U.S. federal system.

## During 2022, the parole population decreased in 37 jurisdictions

The parole population decreased in 36 states and the District of Columbia during 2022 (table 3). Jurisdictions with a decrease in 2022 accounted for almost three-quarters (74%) of the total parole population.

Across all jurisdictions with a decrease in 2022, adults under parole supervision in the United States decreased by 50,100. Similar to 2021, New York, California, Pennsylvania, and Texas continued to have the largest decreases, along with Ohio in 2022.<sup>3</sup>

Parole populations grew in 10 states and the U.S. federal system's term of supervised release in 2022, with West Virginia making up almost a quarter of the increase (23%). (See appendix table 10.)<sup>4</sup>

<sup>3</sup>See *Probation and Parole in the United States, 2021* (NCJ 305589, BJS, February 2023).

<sup>4</sup>See *Methodology* for details on the Sentencing Reform Act's elimination of parole from federal sentencing.

**TABLE 2**  
Change in probation population, by jurisdiction, 2022

Jurisdiction	January 1, 2022	December 31, 2022	Change in population	Share of total increase	Number of jurisdictions
U.S. total	2,981,500	2,990,900	9,400	~	52
Jurisdictions with an increase in persons on probation	1,806,600	1,867,500	60,800	100%	29
Texas	345,600	364,200	18,600	30.6	~
Georgia	349,700	359,400	9,700	16.0	~
Maryland	55,200	59,300	4,100	6.7	~
Arizona	69,600	73,100	3,500	5.8	~
Virginia	57,500	60,600	3,100	5.2	~

Note: The U.S. total number of jurisdictions includes the 50 states, the District of Columbia, and the U.S. federal system. The five states with the largest increase in their probation population are shown. See appendix table 6 for estimates for all jurisdictions.

## The rate of adults supervised in the community fell for the 15th consecutive year in 2022

During 2022, 1 in 71 adult U.S. residents were under community supervision (table 4). In this year, the rate fell to 1,401 adults under community supervision per 100,000 adult U.S. residents, the lowest since 1986 (1,358 per 100,000) (not shown in tables). The parole rate declined during 2022 to 267 persons on parole per 100,000 adult U.S. residents, while the probation rate increased slightly, from 1,140 persons on probation per 100,000 adult U.S. residents in 2021 to 1,142 per 100,000 in 2022.

### During 2022, entries to probation rose 10.7%

Entries to probation increased from 1,419,300 in 2021 to 1,571,500 in 2022, a 10.7% increase (figure 4). Total movements (entries onto and exits off of probation) increased from 2,972,500 to 3,097,800 during the same time, the second consecutive increase after a large drop from 2019 to 2020. Entries and exits reflect the administrative caseloads of probation agencies. A person can enter or exit the probation system more than once during a year or concurrently serve multiple probation sentences for separate crimes. Reported entries to probation in 2022 (1,571,500) exceeded exits (1,526,300) for the first time since 2008 (not shown in tables).

**FIGURE 4**  
Estimated total probation movements, entries, and exits, 2012–2022

Note: Counts for 2020 and earlier may differ from previously published statistics. Counts are rounded to the nearest 100. Counts are based on movements from January 1 to December 31 for each year. See appendix table 3 for estimates.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2012–2022.

Probation exits include successful completions of supervision; exits to serve a period of incarceration, including to receive treatment; exits due to absconding, detainment, or other unsatisfactory reasons besides incarceration; and exits due to death or other reasons.

**TABLE 4**  
Community supervision rate of adult U.S. residents, 2012–2022

Year	Per 100,000 adult U.S. residents			Adult U.S. residents on—		
	Community supervision	Probation	Parole*	Community supervision	Probation	Parole*
2012	1,984	1,634	356	1 in 50	1 in 61	1 in 281
2013	1,949	1,606	349	1 in 51	1 in 62	1 in 287
2014	1,916	1,572	349	1 in 52	1 in 64	1 in 287
2015	1,873	1,527	351	1 in 53	1 in 66	1 in 285
2016	1,811	1,466	349	1 in 55	1 in 68	1 in 287
2017	1,786	1,444	347	1 in 56	1 in 69	1 in 289
2018	1,729	1,391	345	1 in 58	1 in 72	1 in 290
2019	1,701	1,363	343	1 in 59	1 in 73	1 in 291
2020	1,504	1,181	333	1 in 66	1 in 85	1 in 300
2021	1,440	1,140	309	1 in 69	1 in 88	1 in 324
2022	1,401	1,142	267	1 in 71	1 in 88	1 in 375

Note: Details may not sum to totals because the community supervision counts were adjusted to exclude the yearend number of adults on parole who were also on probation. See table 9 for counts of adults on parole who were also on probation. Estimates are based on the most recent data available at the time of publication and may differ from previously published statistics. Reporting methods for some probation agencies changed over time. See *Methodology*. Rates are based on total community supervision, probation, and parole counts as of December 31 of the reporting year and calculated using U.S. Census Bureau estimates of U.S. residents age 18 or older for January 1 of the following year.

\*California parole data for 2022 are not comparable to prior years. See *Methodology*.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2012–2022; and U.S. Census Bureau, National Intercensal Estimates, 2013–2023.

During 2022, successful completions of probation accounted for two-thirds (66%) of exits among adults whose type of exit was known (table 5). Incarceration of adults previously under probation supervision during 2022 represented 15% of known types of exits. Nearly a third (31%) of all reported probation exits in 2022 did not include a known type of exit, similar to 2021 and 2020 (both 34%).

### Exits from parole exceeded entries by 46,500 during 2022

Total movements onto and off of parole supervision decreased for the fourth consecutive year in 2022 (figure 5). Entries to parole dropped from 357,000 in 2021 to 319,200 in 2022. Additionally, parole exits dropped from 410,200 in 2021 to 365,700 in 2022. Parole exits exceeded entries by 46,500 in 2022. This is the fourth time since 2012 that parole exits have exceeded entries.

**FIGURE 5**  
Estimated total parole movements, entries, and exits, 2012–2022

Note: Counts for 2020 and earlier may differ from previously published statistics. Counts are rounded to the nearest 100. Counts are based on movements from January 1 to December 31 for each year. See appendix table 4 for estimates.

Source: Bureau of Justice Statistics, Annual Parole Survey, 2012–2022.

**TABLE 5**  
Exits from probation, by type of exit, 2012–2022

Year	Percent of total exits					Percent of known type of exits*			
	Completion	Incarcerated	Unsatisfactory exit other than incarceration	Death/other	Unknown/not reported	Completion	Incarcerated	Unsatisfactory exit other than incarceration	Death/other
2012	52.9%	11.7%	9.5%	4.0%	21.9%	67.8%	14.9%	12.2%	5.1%
2013	50.2	11.6	10.3	3.8	24.1	66.1	15.3	13.6	5.0
2014	51.7	11.5	12.7	4.3	19.7	64.5	14.3	15.8	5.4
2015	49.1	11.4	13.1	4.8	21.5	62.6	14.5	16.7	6.2
2016	46.9	11.3	15.6	4.5	21.8	59.9	14.4	20.0	5.7
2017	50.0	11.4	15.6	4.4	18.7	61.4	14.0	19.2	5.4
2018	56.3	15.4	6.3	3.5	18.5	69.1	18.9	7.7	4.3
2019	50.5	11.8	7.6	3.4	26.7	68.9	16.2	10.3	4.6
2020	43.4	9.4	5.1	8.1	34.1	65.8	14.2	7.7	12.3
2021	42.1	9.8	5.7	8.9	33.5	63.3	14.7	8.6	13.3
2022	45.5	10.3	4.8	8.2	31.3	66.3	14.9	6.9	11.9

Note: Details may not sum to totals due to rounding. See appendix table 7 for detailed type of exits. Percentages for 2018 through 2022 are not comparable to previously reported data. From 2016 to 2018, California reported incomplete data for probation exits and did not report any details on exits in 2019 through 2022. Georgia was unable to report data in 2016.

\*Excludes unknown and unreported type of exits.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2012–2022.

Of adults who exited parole during 2022 with a known exit type, 65% successfully completed their term of parole (table 6). This is the same completion rate as 2021 (65%). About one-quarter (27%) of exits from parole with known reasons in 2022 were due to incarceration. Among these exits, the portion due to a return to incarceration varied between 23% in 2020 and 31% in 2013. In 2022, return to incarceration accounted for 27% of known parole exits. The exit type was unknown for about 9% of parole exits in 2022.

### Percent of adults on probation for a felony offense increased from 2012 to 2022

Among adults on probation whose type of offense was known, 65% were on probation in 2022 due to a felony, up from 53% in 2012 (table 7). About 35% of adults on probation with a known offense in 2022 had a misdemeanor offense. Among adults under community supervision for whom the most serious offense was known, 25% of those on probation and 39% of those on parole had committed a violent offense (table 8). The percent of adults on parole supervision who had been incarcerated for a drug offense continued to drop, falling

from 30% in 2021 to 27% in 2022. Among adults on probation for whom the most serious offense was known, the portion who were on probation for a drug offense remained steady at about one-quarter between 2012 (25%) and 2022 (26%).

The sex distribution of persons on community supervision for whom sex was known remained consistent over the past 10 years for both probation and parole. Females made up 24% of the reported adult probation population and 11% of the adult parole population in both 2012 and 2022. The race and ethnicity distribution of those on parole and probation in 2022 largely reflects the distribution in 2012.

Among adults on probation with a known supervision status, the portion with only financial conditions remaining increased from 2012 (1%) to 2022 (5%). Active probation supervision decreased from 73% of the probation population for whom status was known in 2012 to 64% in 2022.

About 80% of adults on parole with a known supervision status were under active supervision in 2022, while less than 1% had only financial conditions.

**TABLE 6**  
Exits from parole, by type of exit, 2012–2022

Year	Percent of total exits					Percent of known type of exits*			
	Completion	Returned to incarceration	Unsatisfactory exit other than returned to incarceration	Death/other	Unknown/not reported	Completion	Returned to incarceration	Unsatisfactory exit other than returned to incarceration	Death/other
2012	56.7%	24.5%	11.8%	4.0%	3.1%	58.5%	25.2%	12.2%	4.1%
2013	50.2	25.2	2.7	4.1	17.7	61.0	30.7	3.3	5.0
2014	53.4	24.2	3.3	3.3	15.9	63.5	28.8	3.9	3.9
2015	51.6	23.3	3.2	4.3	17.6	62.6	28.3	3.9	5.2
2016	53.1	25.5	2.9	5.3	13.2	61.2	29.4	3.4	6.1
2017	56.2	27.0	2.6	4.6	9.5	62.1	29.9	2.9	5.1
2018	53.0	24.6	3.1	4.5	14.8	62.2	28.9	3.6	5.3
2019	53.1	24.7	2.0	4.3	15.9	63.1	29.4	2.4	5.1
2020	54.4	18.4	2.4	3.8	21.1	68.9	23.3	3.0	4.8
2021	50.2	20.3	2.2	3.9	23.3	65.4	26.5	2.9	5.1
2022	59.5	24.4	2.3	5.2	8.6	65.1	26.7	2.6	5.6

Note: Details may not sum to totals due to rounding. See appendix table 11 for detailed type of exits.

\*Excludes unknown and unreported type of exits. See *Probation and Parole in the United States, 2012* (NCJ 243826, BJS, December 2013) for information on the California public safety realignment. Percentages for 2013 through 2022 exclude exit data from California due to reporting issues.

## Methodology

The Bureau of Justice Statistics (BJS) began the Annual Probation Survey and Annual Parole Survey in 1980. The surveys collect data from U.S. probation and parole agencies that supervise adults. These data collections define adults as persons subject to the jurisdiction of an adult court or correctional agency. Juveniles sentenced as adults in a criminal court are considered adults. Juveniles under the jurisdiction of a juvenile court or correctional agency are excluded from these data. This report defines community supervision as adults under supervision of state or federal probation and parole authorities. For more information about the following data collections, see the *Search Data Collections* page on the BJS website at <https://bjs.ojp.gov/data/data-collections/search>.

### Data collections

Starting in January of each calendar year, the two surveys collect data on the number of adults supervised in the community on both January 1 and December 31 of the previous calendar year, the number of entries to and exits from supervision during the reporting year, and the characteristics of the probation and parole populations at yearend. Both surveys cover the 50 states, the District of Columbia, and the U.S. federal system. BJS depends on the voluntary participation of state central reporters and separate state, county, and court agencies for these data. Data for the U.S. federal system are provided through BJS's Federal Justice Statistics Program, which obtains community supervision data from the Office of Probation and Pretrial Services, Administrative Office of the U.S. Courts.

### 2022 Annual Probation Survey

The 2022 Annual Probation Survey was sent to 501 agencies. The 501 agencies included 42 central state agencies and the District of Columbia; 458 separate state, county, or court agencies; and the federal system. States with multiple state agencies included Alabama (3), Colorado (8), Florida (41), Georgia (2), Idaho (46), Kentucky (3), Michigan (129), Missouri (2), Montana (4), New Mexico (2), Ohio (182), Oklahoma (3), Pennsylvania (3), Tennessee (3), and Washington (32). The sum of parts may be greater than the total reported. Some jurisdictions with central state agencies are included in states with multiple agencies.

Of the 501 agencies in the population frame, 132 did not provide data or provided incomplete data for the 2022 data collection. These agencies were in: Colorado (3), Georgia (1), Florida (13), Idaho (10), Kentucky

(1), Michigan (36), Montana (1), Missouri (1), New Hampshire (1), New Mexico (1), Ohio (48), Pennsylvania (1), Tennessee (1), Vermont (1), and Washington (13). In addition, six agencies were determined to be ineligible, three in Idaho, two in Ohio, and one in Pennsylvania.

Almost three-quarters (73%) of the 495 eligible agencies responded to all four key items: January 1 population, December 31 population, entries, and exits. The remaining 27% did not respond to at least one of the four key items, including the 43 agencies that provided no data and 89 agencies that provided incomplete data. During 2022, 89 agencies provided incomplete data: Colorado (2), Florida (9), Georgia (1), Idaho (8), Michigan (28), New Mexico (1), Ohio (32), and Washington (8).

California parole data for 2022 are not comparable to prior years. Updated population counts for post-release community supervision (PRCS) and mandatory supervision (MS) have not been available since 2018. Totals for 2022 do not include any imputation for PRCS or MS. In previously published reports, totals for PRCS and MS populations were included in parole totals.

### 2022 Annual Parole Survey

The 2022 Annual Parole Survey was sent to 55 agencies: 53 central state reporters, the District of Columbia, and the U.S. federal system. In this report, federal parole includes a term of supervised release from prison, mandatory release, parole, military parole, or special parole. A federal judge orders a term of supervised release at the time of sentencing, which is served after release from a federal prison sentence. In the case of Alaska, persons on probation or parole are supervised under a common program, and the data provider is unable to report probation and parole counts separately. Combined counts of persons on probation or parole were reported to BJS through the probation questionnaire. January 1 and December 31 counts were imputed for Alaska, and these figures were deducted from the combined reported totals for the calculation of the state's January 1 and December 31 counts of persons on probation. Of these agencies, three were determined to be ineligible, one in Alaska, one in Maine, and one in Pennsylvania.

Of the 52 eligible agencies surveyed for 2022, all agencies provided the population count at least one of the key items: January 1 numbers, yearend numbers, parole entries, or parole exits, while 94% responded to all key items. New Hampshire, Pennsylvania, and Vermont did not provide complete data on all key survey items, and Alaska's data were estimated using the combined community supervision data provided.

## Annual U.S. Resident Population

BJS receives advanced yearend estimates from the U.S. Census Bureau of national resident populations by age, sex, and race or Hispanic origin. These estimates are based on proprietary calculations using the most recent decennial survey and the American Community Survey results. BJS uses these estimates to calculate rates of correctional supervision.

## Persons under community supervision in the federal system

Since the enactment of the Sentencing Reform Act of 1984 on November 1, 1987, persons sentenced to federal prison are no longer eligible for parole but are required to serve a term of supervised release following release from prison. Those sentenced to prison prior to November 1, 1987, continue to be eligible for parole, as do persons violating laws of the District of Columbia, persons serving in the military, and persons transferred under foreign treaties. (See <https://www.uscourts.gov/services-forms/overview-probation-supervised-release-conditions>.)

In 2008, the Annual Parole Survey added a new type of entry-to-parole category (term of supervised release) to better classify most entries to parole reported by the federal system. This entry is a period of release to the community that follows a period of incarceration based on a determinate sentencing statute. Both periods are determined by a judge at the time of sentencing. For details about estimation methods used to analyze national trends for all types of entry to parole, see *Probation and Parole in the United States, 2010* (NCJ 236019, BJS, November 2011).

The Sentencing Reform Act also required the adoption and use of sentencing guidelines, which took effect on the same day as enactment. Many offenses for which probation had been the typical sentence prior to this date, particularly property and regulatory offenses, subsequently resulted in sentences to prison. Changes in how persons released from federal prisons are supervised in the community were first described in the BJS report *Federal Offenders under Community Supervision, 1987–96* (NCJ 168636, BJS, August 1998) and were updated in *Federal Criminal Case Processing, 2002: With Trends 1982–2002, Reconciled Data* (NCJ 207447, BJS, January 2005).

## Adjustment and changes in probation and parole counts

### Dual community supervision status

Some persons on probation or parole may have dual community supervision statuses because they were serving separate probation and parole sentences at the same time. Beginning with 2007 data, BJS began collecting information on the number of persons on parole who were also on probation at yearend. To avoid double counting, the total community supervision population reported in figure 1, table 1, and appendix table 5, and rates reported in table 4 were adjusted based on available information by excluding the total number of persons on parole who were also on probation. As a result, the probation and parole counts do not sum to the community supervision population. All counts for persons on parole with dual community supervision statuses reflect data reported by parole agencies that could provide the information for the reporting year (table 9). In 2022, agencies in 24 jurisdictions provided such data. The total number of persons on parole who were also on probation may be underestimated due to nonresponding agencies.

**TABLE 9**  
**Adults supervised on both parole and probation adjusted in the January 1 and December 31 community supervision population, 2012–2022**

Year	January 1*	December 31
2012	10,960	12,670
2013	12,670	12,510
2014	12,510	12,920
2015	12,920	9,380
2016	9,380	10,820
2017	10,820	13,300
2018	13,300	18,880
2019	18,880	14,060
2020	14,060	25,400
2021	25,400	21,280
2022	21,280	20,880

Note: Counts are rounded to the nearest 10. Totals for 2021 and earlier may differ from previously published statistics. The community supervision counts were adjusted to exclude adults on parole who were also on probation.

\*Data are based on the December 31 count of the prior reporting year.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2012–2022.

## Changes in reported probation and parole populations

In each collection year, respondents are asked to provide both January 1 and December 31 population counts for the previous year. Therefore, while the December 31, 2021, count was collected in 2022, the January 1, 2022, count was not collected until 2023. At times, the January 1 count from a given year may differ from the December 31 count of the prior year, given the normal daily flow of entries and exits. Additionally, the difference reported may have resulted from administrative changes, such as—

- implementing new information systems, leading to data review and cleanup
- reconciling records of persons on probation
- reclassifying the status of adults on probation or parole, including those shifting correctional authorities and those with dual community supervision statuses
- including certain probation populations not previously reported (e.g., persons supervised for DUI or DWI, some persons on probation who had absconded, and some on an inactive status).

The difference between the probation counts for December 31, 2021, and January 1, 2022, resulted in an increase of 18,400 persons on probation (**table 10**). The difference between the parole population counts for December 31, 2021, and January 1, 2022, resulted in a decrease of 58,000 persons on parole. Most of this decrease is due to the exclusion of the previously reported Mandatory Supervision and Post Release Community Supervision populations in California. See *Probation: Explanatory notes for 2022* and *Parole: Explanatory notes for 2022* for states contributing to the largest differences.

### Adjustment and changes in parole and population counts

In theory, the change in probation and parole populations from the beginning to the end of the year should equal the difference between entries and exits during the year. In practice, those numbers may not be equal. Some probation and parole information systems track the number of cases that enter and exit community supervision, not the number of persons, while the January 1 and yearend populations represent persons. Some persons are being supervised for more than one charge or case simultaneously. Additionally, all data on entries and exits may not have been logged into the respondents' information systems, or the information systems may not have fully processed all data before submission to BJS.

**TABLE 10**  
One-day difference based on reporting changes for probation and parole, 2012–2022

Year	Probation population difference from December 31 to January 1 of the following year	Parole population difference from December 31 to January 1 of the following year
2012	2,960	-23,640
2013	20,980	540
2014	9,750	170
2015	-64,150	130
2016	5,030	2,200
2017	-45,010	-1,240
2018	-18,950	-1,040
2019	-162,650	-27,890
2020	-21,390	2,120
2021	18,440	-57,950

Note: Counts are calculated as the difference between December 31 of the year displayed and January 1 of the following year. Counts are rounded to the nearest 10.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2012–2022.

As a result, the January 1, 2022, probation population plus entries, minus exits, is 35,800 fewer persons than the published December 31, 2021, population at the national level. For persons on parole, the calculated total as of January 1, 2022, is less than 100 more persons than the published December 31, 2021, population. Respondents report all entries and exits from January 1 to December 31 each year.

In all figures and tables in this report, change was calculated as the difference from January 1 to December 31 within the reporting year. Previous reports calculated change as the difference from December 31 of the prior year to December 31 of the reporting year. This calculation was implemented due to the large discrepancy from December 31, 2019, to January 1, 2020, as well as an additional discrepancy from December 31, 2015, to January 1, 2016. In both years, the discrepancies were caused by reporting changes in multiple states. Annual change in reports prior to 2013 was also calculated as the difference between the January 1 and December 31 populations within the reporting year. See *Probation: Explanatory notes for 2022* and *Parole: Explanatory notes for 2022* for states with changes to reporting during 2022.

### Imputing for nonreporting agencies during 2022

BJS used the following methods to impute missing probation and parole data for key items, including the January 1 population, entries, exits, and the December 31 population. The variation in the number and size of reporting agencies per state requires different imputation

methods. Depending on the availability of reported data and the number of reporting agencies in each state, one of the following methods was applied. For detailed calculations, see *Imputation variables and formulas*.

### ***Imputing the January 1, 2022, probation population***

When the January 1, 2022, probation population was missing, the December 31 probation population from the last reported year going back to 2018 was carried forward. This method was used to estimate the January 1, 2022, probation population in 85 nonreporting counties and district agencies in Colorado, Florida, Minnesota, Missouri, New Mexico, Ohio, and Washington. The January 1, 2022, population was imputed for 5.6% of the total probation population.

### ***Imputing the December 31, 2022, probation population***

When counts were missing for the December 31, 2022, probation population, total entries, or exits, the missing values were imputed by assuming no intra-year growth and setting the missing value to the January 1, 2022, population size. This method was used to estimate the December 31, 2022, probation population in 90 nonreporting counties and district agencies in Colorado, Florida, Idaho, Kentucky, Michigan, Missouri, New Mexico, Ohio, Tennessee, and Washington. The December 31, 2022, population was imputed for 2.2% of the total probation population.

### ***Imputing probation entries***

Based on the availability of data, BJS used four methods of ratio estimation to impute probation entries for agencies not reporting these data. Total entries to probation in 2022 were imputed for 13.7% of the entry population.

The first method was used for agencies that reported all four key items in at least one year since 2018 and for which the January 1 and December 31, 2022, populations were equal (likely due to the imputation of one or both of those variables). The entries and exits in the most recent of those years were divided by the beginning and yearend populations from the same year (stock overflow), and the resulting ratio was multiplied by the January 1, 2022, population. When this method was used, entries and exits were imputed with the same value. This method was used to estimate probation entries in 73 nonreporting counties and district agencies in Colorado, Florida, Michigan, Missouri, Ohio, and Washington.

The second method was used to estimate 2022 probation entries for agencies that did not report all four core variables in any single year since 2017 or had different beginning and yearend populations. The ratio of 2021 entries to the January 1, 2021, population was multiplied by the January 1, 2022, population to derive the 2022 entries. This method was used to estimate probation entries and exits for seven nonreporting counties and district agencies in Florida, Idaho, Ohio, and Washington.

The third method estimates 2022 entries in agencies with small populations. This method sums 2022 entries and January 1, 2022, populations for similarly sized agencies within the same state. The ratio of summed entries to summed populations is multiplied by the January 1, 2022, population to approximate 2022 entries for the agency with a missing value for entries. To ensure the stability of the ratio estimator, this method was only employed in states with at least 30 reporting units and was used for 14 agencies in Florida, Michigan, and Ohio.

The fourth method used to estimate probation entries takes the ratio of 2021 imputed entries to the January 1, 2021, probation population and applies that ratio to the agency's January 1, 2022, population. This method was used to estimate probation entries and exits for seven nonreporting agencies in Georgia, Idaho, Kentucky, New Mexico, and Vermont.

### ***Imputing the January 1, 2022, parole population***

When the January 1, 2022, parole population was missing, the December 31 parole population from the prior year was carried forward. This method was used to estimate the January 1, 2022, parole population for Pennsylvania. This represented 6.5% of the total parole population.

### ***Imputing the December 31, 2022, parole population***

When counts were missing for the December 31, 2022, parole population, total entries, or total exits, the missing values were imputed by adding to (or subtracting from) the January 1, 2022, parole population to estimate population change based on what was observed in 2021. The intra-year change in population from January 1 to December 31, 2021—expressed as a proportion of the January 1, 2021, total—was multiplied by the January 1, 2022, total to estimate the 2022 population change. This method was used to estimate the December 31, 2022, parole population for Alaska. This represented 0.1% of the total parole population.

### ***Imputing parole entries***

To estimate parole entries for agencies that did not report these data in 2022 but did report in 2021, BJS calculated the ratio of entries in 2021 to the agency's parole population on January 1, 2021, and applied that ratio to the agency's January 1, 2022, population. This method was used to estimate parole entries in Vermont. Total entries in 2022 were imputed for 0.2% of the entering parole population.

### ***Imputing probation and parole exits***

A single method was used to estimate exits from probation that were not imputed with the first method noted above and for all parole agencies. For both probation and parole, BJS added each agency's estimated entries in 2022 to that agency's population on January 1, 2022, and subtracted that estimate from the population on December 31, 2022. For probation, this method was used for 115 nonreporting agencies in Colorado,

Florida, Idaho, Kentucky, Michigan, Missouri, New Hampshire, Ohio, Pennsylvania, Tennessee, Vermont, and Washington. For parole, this method was used in Pennsylvania and Vermont. Total exits in 2022 were imputed for 7.1% of the exiting probation population and 6.3% of the exiting nonfederal parole population.

### **Imputation variables and formulas**

#### ***2022 Reference Year (RY) Key Variables***

<b>Question Number</b>	<b>Variable Label</b>	<b>Probation Variable</b>	<b>Parole Variable</b>
1	January 1, 2022, population	Q1b	Q1b
2	Total entries	Q2/Q2e	Q2g
3	Total exits	Q3/Q3i	Q3h
4	December 31, 2022, population	Q4	Q4

#### ***Imputation Formulas***

Note: RY = Reference year; PY = Previous year

Probation			
Variable	Variable Label	Imputation Method	Formula
Q1b	Jan 1, RY Population	Carry forward end-year population from previous year going back max 5 years	$Q1b_{RY} = Q4_{PY}$
		Carry forward end-year population of previous year going back max 5 years AND current end-year population imputed as carry forward value	$Q1b_{RY} = Q4_{RY} = Q4_{PY}$
Q2e	Total Entries	Flow stock ratio applied to beginning-year population, if beginning = end-year population and 1 of previous 5 years contains reported values for all four core variables	$Q2e_{RY} = Q3i_{RY} = Q1b_{RY} \left( \frac{\text{flow}}{\text{stock}} \right)$ Where $\text{flow} = \frac{Q2e_{RY} + Q3i_{RY}}{2}$ And $\text{stock} = \frac{Q1b_{RY} + Q4_{RY}}{2}$
		Ratio previous year entries/beginning-year population applied to beginning-year population	$Q2e_{RY} = Q1b_{RY} \left( \frac{Q2e_{PY}}{Q1b_{PY}} \right)$
		Pooled ratio of entries/beginning-year populations for agencies of similar size and within state for current year applied to beginning-year population	$Q2e_{RY} = Q1b_{RY} * R_{jk}$ Where $R_{jk} = \frac{\sum_{i=1}^n Q2e_{ijk}}{\sum_{i=1}^n Q1b_{ijk}}$ for <i>i</i> agency in <i>j</i> category of similar sized agencies within state <i>k</i> for current year
		Not enough respondents for pooled ratio; flow stock ratio method used	See flow stock ratio method above
Q3i	Total Exits	Flow stock ratio applied to beginning-year population; if beginning = end-population and 1 of previous 5 years contains reported values for four core variables	See Q2e flow stock ratio method above
		Ratio previous year exits/beginning-year population applied to beginning-year population	$Q3i_{RY} = Q1b_{RY} \left( \frac{Q3i_{PY}}{Q1b_{PY}} \right)$
		Entries imputed; balancing relationship applied to get exits	$Q3i_{RY} = Q1b_{RY} + Q2e_{PY} - Q4_{PY}$
Q4	Dec 31, RY Population	Beginning-year = end-year population also missing either entries or exits	$Q4_{RY} = Q1b_{RY}$

Parole			
Variable	Variable Label	Imputation Method	Formula
Q1b	Jan 1, RY Population	Carry forward end-year population of previous year going back max 5 years AND current end-year population imputed as carry forward value	$Q1b_{RY} = Q4_{RY} = Q4_{PY}$
Q2g	Total Entries	Ratio previous year entries/beginning-year population applied to beginning-year population; entries and exits missing	$Q2g_{RY} = Q1b_{RY} \left( \frac{Q2G_{PY}}{Q1b_{PY}} \right)$
Q3h	Total Exits	Entries imputed; balancing relationship applied to get exits	$Q3h_{RY} = Q1b_{RY} + Q2g_{PY} - Q4_{PY}$
Q4	Dec 31, RY Population	Net difference ratio estimate based on previous year applied to beginning-year population	$Q4_{RY} = Q1b_{RY} + Q1b_{RY} \left( \frac{Q4_{PY} - Q1b_{PY}}{Q1b_{PY}} \right)$

## Probation: Explanatory notes for 2022

Probation agencies vary in their ability to provide counts each year consistent with BJS definitions. Some agencies report the number of cases, while others report the number of persons they supervise. Because a person can have multiple probation sentences, counting cases can artificially inflate probation totals. BJS requests that agencies report the number of persons under supervision, and each year some agencies make the conversion, resulting in what appears to be a large decrease from previous years' data. BJS documents these and other reporting anomalies below.

**Alaska**—Alaska supervises probation and parole in a combined program. The state agency was unable to report probation and parole data separately, so both populations were reported in the probation survey. January 1, 2022 and December 31, 2022, probation population counts were derived based on the difference between the reported probation and imputed parole count based on the December 31, 2021, parole population count.\*

**Colorado**—Nonreporting agencies in 2022—Colorado has eight agencies—one state agency, representing 92% of the state's total probation population; five reporting local agencies; and two nonreporting local agencies. For the two nonreporting agencies, December 31, 2021, population counts were used to estimate January 1, 2022, populations, where available.\*

**Delaware**—The Delaware Court system returned to normal operations in 2022, which has led to an increase in the probation population for the first time since before the beginning of the pandemic.

**Florida**—Nonreporting agencies in 2022—Florida has 41 agencies—1 state agency, representing 73% of the state's total probation population; 28 reporting local agencies; and 12 local agencies that did not report data. The December 31, 2021, population count was used to estimate January 1, 2022, and December 31, 2022, counts for nine of these agencies. The remaining three agencies did not report the number of entries and exits.\*

**Georgia**—Georgia has two reporters from the same agency, the Georgia Department of Community Supervision (DCS). One reporter provides counts based on individual-level information from Georgia state employees (probation officers) and represents 45% of Georgia's total probation population. The other reporter provides counts based on summary counts submitted by independent local probation agencies to the DCS and

represents 55% of Georgia's total probation population. One agency in Georgia was unable to report entries for 2022.

**Idaho**—Nonreporting agencies in 2021—Idaho has historically reported probation data through two agencies: the Idaho Department of Correction and the Idaho Supreme Court. However, beginning in 2020, the Idaho Supreme Court announced that it would no longer be reporting data and instead requested that all local probation agencies report directly. This means that Idaho now has one state agency, the Idaho Department of Correction, which provides information on felons and represents 63% of Idaho's total probation population. There were 34 reporting local agencies and 8 nonreporting local agencies. The December 31, 2021, population counts were used to estimate January 1, 2022, and December 31, 2022, populations.\*

**Illinois**—Nonreporting agencies in 2022—Illinois is undergoing case management data overhauls. A few downstate departments are still pending minor data entry and/or corrections. Cook County was not able to enter any data as of the time of publication. The lack of Cook County figures accounts for the large difference in numbers. The December 31, 2021, population counts were used to estimate January 1, 2022, and December 31, 2022, populations.\*

**Michigan**—Nonreporting agencies in 2022—Michigan has 129 agencies: 1 state agency, representing 46% of Michigan's total probation population; 105 reporting local agencies; and 29 nonreporting local agencies. For the 29 nonreporting agencies, December 31, 2021, population counts were used to estimate January 1, 2022, and December 31, 2022, populations, where available. Other agencies did not report the number of entries to or exits from probation.\*

**Missouri**—Nonreporting agency in 2022—Missouri has two agencies: one state agency, representing over 99% of Missouri's total probation population, and one nonreporting local agency. For the nonreporting agency, December 31, 2021, population counts were used to estimate January 1, 2022, and December 31, 2022, populations.\*

**Nevada**—Reporting changes in 2022—Due to re-evaluation of the data, it was discovered that the previous population data did not include absconders with active warrants or individuals on outgoing interstate compact. Data in 2022 are not comparable to previously reported data.

**New Jersey**—Reporting changes in 2022—In 2021, the state agency in New Jersey started reporting on the number of cases, not individuals as was previously reported. For this report, January 1 and December 31, 2022, used estimates of number of individuals.

**New Mexico**—New Mexico has two agencies: one state agency, representing 78% of the state's total probation population, and one nonreporting local agency. For the nonreporting agency, the December 31, 2021, population count was used to estimate the January 1, 2022, population.\*

**Ohio**—Nonreporting agencies in 2022—Ohio has 180 agencies—1 state agency, representing 3% of the state's total probation population; 146 reporting local agencies; and 33 nonreporting local agencies. For the 33 nonreporting agencies, December 31, 2021, population counts were used to estimate January 1, 2022, populations, where available. Many agencies reported switching their case management systems between 2020 and 2022, resulting in changes to reporting. The updated system provides better estimates on the number of individuals on probation.\*

**Oklahoma**—Reporting changes in 2022—The Oklahoma Department of Corrections has recently converted data between two databases and many data are in the process of validation and/or re-matching. Data reported for 2022 are estimates and not comparable to previously reported data.

**Tennessee**—Nonreporting agencies in 2022—Tennessee has three agencies: one state agency, representing 97% of the state's total probation population; one reporting local agency; and one nonreporting local agency. For the nonreporting agency, the December 31, 2021, population count was used to estimate the January 1, 2022, population.\*

**Washington**—Nonreporting agencies in 2022—Washington has 32 agencies: 1 state agency, representing 19% of the state's total probation population; 23 reporting local agencies; and eight nonreporting local agencies. For the eight nonreporting agencies, December 31, 2021, population counts were used to estimate January 1, 2022 populations. Many agencies reported switching their case management systems between 2020 and 2022, resulting in changes to reporting. The updated system provides better estimates on the number of individuals on probation.\*

---

## Parole: Explanatory notes for 2022

Each year, changes in legislation or offender management systems require states to alter previously submitted data or the data they can currently submit. The Bureau of Justice Statistics documents these changes as reported by the respondents.

**Alaska**—Alaska supervises probation and parole in a combined program. The state agency was unable to report probation and parole data separately, so both populations were reported in the probation survey. The January 1, 2022, and December 31, 2022, parole population counts were imputed based on the December 31, 2021, parole population count.\*

**California**—Reporting changes in 2022—Updated population counts for post-release community supervision (PRCS) and Mandatory Supervision (MS) have not been available since 2018. Totals for 2022 do not include any imputation for PRCS or MS. Therefore, data are not comparable to prior years. Previously published reports included totals for PRCS and MS populations that were included in parole totals.

**Idaho**—Reporting changes in 2022—In 2022, the Idaho Department of Correction started using a new offender management system. Every effort has been made to ensure that the numbers are comparable to previous years, but slight variations may occur due to the complete overhaul of the data organizational structure that took place.

**Maine**—Reporting changes in 2022—Maine no longer has a parole program and was removed from the Annual Parole Survey in 2022. All community supervision is accounted for in the probation population.

**Massachusetts**—Reporting changes in 2022—The Massachusetts Parole Board generated a disaggregated population inquiry in 2022. This source was utilized to answer the majority of questions, whereas in previous years, multiple reports and sources were used to produce the requested population totals.

**New Hampshire**—Nonreporting agencies in 2022—New Hampshire was unable to report entries during 2022.\*

**New York**—Due to new legislation effective on March 1, 2022, many individuals on community supervision were eligible for earned time credit of up to 2 years off their maximum expiration date. This resulted in an unusually large number of individuals being discharged from supervision in 2022.

**Oklahoma**—Reporting changes in 2022—The Oklahoma Department of Corrections has recently converted data between two databases and data are in the process of validation and/or re-matching. Data reported for 2022 are estimates and not comparable to previously reported data.

**Pennsylvania**—Nonreporting agency in 2022—Pennsylvania was unable to report a total number of exits in 2022.\*

**Vermont**—Nonreporting agency in 2022—Vermont was unable to report entries or exits during 2022.\*

**Wisconsin**—Reporting changes in 2022—Detailed data for entries to and exits from parole are new since 2021 and may fluctuate more widely than normal as procedures for reporting continue to improve.

**APPENDIX TABLE 1****Counts for figure 2: Annual percent change of adults on probation, 2012–2022**

Year	Annual percent change
2012	-1.0%
2013	-0.9
2014	-1.7
2015	-2.3
2016	-1.4
2017	-0.8
2018	-1.7
2019	-0.8
2020	-8.3
2021	-2.3
2022	0.3

Note: Counts for 2021 and earlier may differ from previously published statistics. Annual percent change is based on the difference in population from January 1 to December 31 for each year. See table 1 for population counts.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2012–2022.

**APPENDIX TABLE 2****Estimates for figure 3: Annual percent change of adults on parole, 2012–2022**

Year	Annual percent change
2012	0.7%
2013	1.8
2014	0.9
2015	1.5
2016	0.5
2017	-0.2
2018	0.5
2019	0.2
2020	1.3
2021	-7.1
2022	-6.2

Note: Counts for 2021 and earlier may differ from previously published statistics. Annual percent change is based on the difference in population from January 1 to December 31 for each year. See table 1 for population counts.

Note: Details may not sum to totals due to rounding; counts are rounded to the nearest 10. Due to nonresponse or incomplete data, the community supervision population for some jurisdictions on December 31, 2022, does not equal the population on January 1, 2022 plus entries, minus exits.

..Not known.

--Less than 0.05%.

<sup>a</sup>Rates were calculated using U.S. Census Bureau estimates of U.S. residents age 18 or older for January 1, 2023, in each jurisdiction.

<sup>b</sup>January 1 and December 31 probation counts are estimates of individuals.

<sup>c</sup>Imputed counts differ from reported counts in jurisdictions where data were not available. BJS imputed where data were not available. See *Methodology*.

..Not known.

~Not applicable.

<sup>a</sup>Includes adults on probation who were discharged from supervision when they did not complete the conditions of probation or fulfill obligations.

<sup>b</sup>Includes 12,800 adults on probation who transferred to another jurisdiction and 91,100 who exited supervision for other reasons.

<sup>c</sup>Some or all data were estimates.

Wisconsin <sup>c</sup>	22,510	6,280	6,280	6,250	6,250	22,510	0	--	1,583
Wyoming	830	540	540	540	540	840	0	0.5	18

Note: Details may not sum to totals due to rounding. Due to nonresponse or incomplete data, the parole population for some jurisdictions on December 31, 2022, does not equal the population on January 1, 2022, plus entries, minus exits. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data.

..Not known.

--Less than 0.05%.

<sup>a</sup>Maine no longer has a parole program and was removed from the Annual Parole Survey for 2022.

<sup>b</sup>Rates were calculated using U.S. Census Bureau estimates of U.S. residents age 18 or older for January 1, 2023, in each jurisdiction.

<sup>c</sup>Imputed counts differ from reported counts in jurisdictions where data were not available. BJS imputed where data were not available. See *Methodology*.

<sup>d</sup>Data for parole entries and exits are subject to fluctuation. See *Parole: Explanatory notes for 2022* for details.

<sup>e</sup>California parole data are not comparable to prior years. See *Methodology*.

The Bureau of Justice Statistics of the U.S. Department of Justice is the principal federal agency responsible for measuring crime, criminal victimization, criminal offenders, victims of crime, correlates of crime, and the operation of criminal and civil justice systems at the federal, state, tribal, and local levels. BJS collects, analyzes, and disseminates reliable statistics on crime and justice systems in the United States, supports improvements to state and local criminal justice information systems, and participates with national and international organizations to develop and recommend national standards for justice statistics. Kevin M. Scott, PhD, is the acting director.

This report was written by Danielle Kaeble. Stephanie Mueller and Nicole Mack verified the report. RTI International is the data collection agent for the report. Ashley Griggs, Carson Hurt, Erin Kennedy, Nicole Mack, Timothy Smith, and Ryan Weber led data collection and processing efforts for the report.

Becky Lewis edited the report. Jeffrey Link produced the report.
