FOREWORD

I am pleased to introduce the seventh edition of the *Directory of Criminal Justice Issues in the States*. This publication highlights the work of the nation's 50 criminal justice Statistical Analysis Centers (SACs) located throughout the United States and its territories. These centers perform the critical functions of gathering and analyzing data about criminal justice operations at the state and local levels where a majority of actions take place.

Examining the activities of the SACs has always been a reliable way to gauge the most prominent criminal justice issues. It is for this reason that the *Directory of Criminal Justice Issues in the States* is a tremendous resource for anyone involved in the understanding of criminal justice issues. This publication highlights the work of the SACs and continues to provide criminal justice researchers and policymakers with a guide to the abundance of research being conducted at the state level on such timely issues as substance abuse, sentencing, prison and jail crowding, and recidivism.

I invite you to peruse this year's *Directory*, call the contact person listed for any activity you may have questions about, and utilize this resource to the fullest extent.

Steve Rickman
President, CJSA
Office of Criminal Justice Plans
and Analysis
Washington, DC

HOW TO USE THIS DIRECTORY

The *Directory of Criminal Justice Issues in the States* is a handy reference to state activities and research initiatives in criminal justice. The book is organized into five sections for easy use.

The first section is a brief summary of the SAC research and analysis activities listed in the *Directory*. It focuses on the major criminal justice policy issues confronting the states in 1989.

The second section provides a detailed listing of SAC activities including the title, a brief description, data sources used, date of completion, and a contact person for each SAC activity. The list is in alphabetical order by state to aid the reader in locating a particular state or agency.

Section three is an index of all activities by issue area. Upon examination of this section, the reader may locate all SAC activities on a particular topic. The 38 issue areas found in the index are listed on page 55.

Section four includes a listing of recent reports published by the Statistical Analysis Centers. This section was added in last year's directory to provide the reader with a list of criminal justice reports available from the SACs.

The final section is an appendix. The address and telephone number of each Statistical Analysis Center is contained in Appendix 1. Although a brief summary of each activity is provided in the *Directory*, the research design, findings, and other detailed information are not. The reader may request such information by contacting the appropriate agency and person.

Appendix 2 contains a brief description of the Criminal Justice Statistics Association and several products offered by CJSA. Among these are the Computerized Index to Data Sources (CIDS) from which this directory is drawn, and the IMPACT Forecasting Package. If further information is desired, the reader should contact the Association directly.

INTRODUCTION

The *Directory of Criminal Justice Issues in the States* is a guide to criminal justice programs and policy research conducted by the state Statistical Analysis Centers (SACs). The *Directory* is presented as an aid to all who seek to identify sources of state criminal justice information. National policymakers will discover the major criminal justice issues under debate and analysis in the states. State policymakers will gain knowledge on the current activity of other states for the exchange of criminal justice information. Agencies interested in developing criminal justice libraries or resource materials will find this publication of special value, not only as a resource in its own right, but also for the information it provides on available SAC publications.

Located in almost every state, the SACs conduct objective analyses to meet critical planning needs and address statewide and systemwide criminal justice policy issues. These agencies contribute to viable, effective policy development through statistical services, research, evaluation, and policy analysis.

The SAC program originated in 1972 as a component of the National Criminal Justice Information and Statistics Service (NCJISS). Although most SACs are predominantly funded by the states, they continue to maintain a close working relationship with the Bureau of Justice Statistics which supports special research and analysis activities. Since the advent of state funding, a majority of the agencies have taken a variety of titles. The generic term SAC is used throughout this directory for consistency's sake.

In 1983, the staff of the Criminal Justice Statistics Association (CJSA) first surveyed the SACs on the types of research and analytical activities in which they were involved and developed a computerized index to state activities in criminal justice. The index, (called Computerized Index to Data Sources or CIDS) contains information on SAC research and activities, SAC reports, and characteristics of state automated data sets. Information from CIDS was compiled to publish the first *Directory of Criminal Justice Issues in the States* in June 1984, and it has been published annually since.

CIDS now contains information on SAC activities from 50 states and territories. This directory is a summary of the 1989 activities and publications of the SACs.

THE MAJOR CRIMINAL JUSTICE ISSUES IN 1989

Public policy development requires reliable information. The SACs perform a critical role in public policy development by providing decisionmakers with information on crime and criminal justice data quality and availability as well as on substantive policy issues. Each year the SACs report on the criminal justice issues in which they are involved, revealing a commonality in the major criminal justice issues confronting all states. Many SACs examine similar issues, indicating areas of national concern. An analysis of the criminal justice issues addressed by reported SAC activities across the nation reveals that certain issues are predominant. These issues span the entire criminal justice system and include police, courts, and corrections as well as juvenile delinquency, recidivism, and substance abuse. The following table presents issue areas studied by the SACs, and the number of states involved in each one from 1987 to 1989.

ISSUE	NO. OF STATES			ISSUE	NO. OF STATES		
	1989	1988	1987		1989	1988	1987
Police	32	37	31	Domestic Violence	12	19	17
Substance Abuse	27	32	27	Crime Prevention	12	18	17
Sentencing	26	29	37	Crime Projections	11	16	15
Courts	26	34	32	Sexual Assault	11	12	14
Jail	23	32	28	Rehabilitation	10	13	15
Juvenile Delinquency	23	29	29	Plea Bargaining	9	16	16
Prosecution	22	26	24	Public Attitudes	9	13	14
Management/Personnel	22	21	19	Traffic Safety	7	10	8
Recidivism	21	17	22	Child Abuse	7	14	13
Overcrowding	21	27	23	Risk Assessment	7	9	10
Population Projections	18	24	20	Female Crime	5	11	10
Parole	17	25	22	Status Offenses	5	10	8
Victims	16	23	24	Bail	5	11	11
Probation	16	24	22	Restitution	4	7	12
Corrections	14	—	—	White Collar Crime	4	2	2
Drunk Driving	13	23	17	Prisons	4	—	—
Alternatives to Incarceration	13	18	13	Expenditures/Budget	4	—	—
Pretrial Release	13	16	17	Missing Children	2	1	3
Homicide	12	17	10	Bias Crime	2	1	4

The development of a new classification scheme in SAC activities resulted in alterations to the numbers of SAC activities in certain areas. This new scheme created a distinction between standard statistical reporting versus focused topical research. This resulted in fewer entries per issue areas across the board. The lower numbers for 1989, thus, should not be interpreted as a downturn in SAC activities. In addition, two categories have been added to the list of issues. A category of "corrections" was added because broad categories existed for other components of the criminal justice system including "police" (law enforcement) and "courts." Additionally, the "prisons" category was added to allow a distinction between the work SACs do relating to jails and prisons. A third issue, "expenditure/budget," was added to reflect the emerging importance of this topic as a SAC analysis activity.

Nineteen eighty-nine was a year which saw the formation of the National Office of Drug Control Strategy, the selection of a *Drug Czar*, and the establishment of the first ever national drug control strategy. This enormous effort to eradicate illicit drugs is not only a Federal one, it is a national effort as evidenced by the number of SACs conducting research and analysis in the area of substance abuse. SACs in 27 states were involved in activities related to substance abuse in 1989.

A rise in crime, generally attributed to the drug problem, has caused concern among state policymakers, especially as it relates to crowding in the criminal justice system. An increased number of SACs are addressing issues related to crowding. Sentencing emerged as a major issue as 26 SACs examined matters such as sentencing alternatives and the effect of determinant sentencing on crowding in jails and prisons. Similarly, 22 SACs explored trends in prosecution, and 21 SACs examined prison and jail crowding.

Recidivism received increased attention as 21 states conducted some kind of research on repeat offenders to perform tasks such as resource allocation and projecting future needs in the areas of prison and jail construction as well as treatment.

As in 1988, the issue studied by the most states concerned police. SACs studied police procedures, compiled police policies and training manuals, and examined law enforcement turnover, among other police related issues. Police issues are likely to stay in the spotlight as policymakers try to determine how best to utilize this most important resource in fighting crime and drug abuse.

Because SACs address the major concerns of criminal justice decisionmakers, their activities serve as lead indicators of the most important criminal justice issues confronting the states and the nation. To provide the reader a quick summary of the issues each state SAC is involved in, the following table serves as a guide.

THE DIRECTORY

ALABAMA

ACJIC Newsletter

The newsletter touches on topics of interest to sheriffs and police departments. It emphasizes the NCIC terminal standards and usage, but includes all the components of the Alabama Criminal Justice Information Center.

Data Sources: UCR/IBR, CCH, Police Departments, NCIC

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Alabama Rape Data

The data set contains information on age and race of victim and offender, the type of weapon used, the location of the incident, the relationship of the victim to the offender, and the month, year, day, and time of day of the incident.

Data Sources: UCR/IBR, Supplemental Rape Reports

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Check and Review of Incident Reports Sent into Alabama's UCR Program

This activity reviews the record keeping procedures of police and sheriffs departments to ensure compliance with FBI guidelines and definitions for UCR/IBR reporting. Emphasis is also put on sending the required paperwork for clearances and unfounded cases.

Data Sources: Police Departments, UCR/IBR

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Cooperative Agreement with Forensic Sciences

In this project, the Alabama Department of Forensic Sciences will forward drug information to the SAC for trend studies. This agreement is currently in the test phase.

Data Sources: Police Departments, Sheriff Departments, UCR/IBR, Department of Forensic Sciences

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Crime Analysis for Jefferson County Sheriff's Office

The SAC uses sector number, time of day, and day of week to present crime data on eleven subdivisions in Jefferson County. Similar reports are available to any police agency using the IBR report forms for manpower reallocation.

Data Sources: UCR/IBR, Incident Report Forms

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Crime in Alabama Report

Clearance and arrest data are presented for the seven index offenses and arson, and are broken down by city, county, Metropolitan Statistical Areas, and state. Charts, tables, graphs, and summary narratives are used to describe crime in the state for the current year.

Data Sources: UCR/IBR, Supplemental Crime Reports

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

IBR—A Management Tool

This publication describes special reports which are available to local police agencies which utilize the Alabama Uniform Incident/Offense Supplement and Arrest reports. Some of these special reports include sector breakdowns, time of day and day of week reports, crime breakdowns by shift, by offense, etc.

Data Sources: UCR/IBR, Police Departments

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Law Enforcement Directory

This directory contains names, mailing addresses, and phone numbers for sheriffs, police, and public safety departments; colleges and universities; and state agencies with law enforcement capabilities.

Data Sources: Local Directories

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Patty Lambrecht
(205) 832-4930

Law Enforcement Officer's Handbook

The Law Enforcement Officer's Handbook will be distributed to every law enforcement officer in Alabama. This handbook will cover LEDS/NCIC inquiries and instructions on completing the revised Incident/Offense Supplement and Arrest reports and fingerprint cards as well as a brief synopsis of special reports available through the SAC.

Data Sources: Handbook

ALABAMA-ALASKA

Date of Completion: Continuing Activity
Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130
Contact: Therese Ford
(205) 832-4930

Management Study

The SAC conducted a management study of a police department. Staff analyzed current policies and procedures, made recommendations, etc.

Data Sources: Police Departments, Interviews, Policy and Procedure Manuals

Date of Completion: 07/1989

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

PC Program for IBR Submission

A PC program and procedure/document manual was developed to provide an alternative to the way Alabama's police and sheriffs' departments report their crime data. These agencies will be building a local database for their own personal use.

Data Sources: UCR/IBR

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Sector Breakdowns

Sector breakdowns can be done for any police agency using Incident/Offense report forms and sector numbers. This report will show administrators where crime is occurring and can also be broken down by time of day and day of week.

Data Sources: UCR/IBR, Police Departments

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street
Montgomery, AL 36130

Contact: Therese Ford
(205) 832-4930

Training Courses on the PC for Incident Reporting (UCR)

ACJIC developed a PC program for use on MSDOS compatible hard disk computers. These programs are available to any agency upon request. A training class was developed to assist local agencies in the use of these programs.

Data Sources: UCR/IBR

Date of Completion: Continuing Activity

Agency: Alabama Criminal Justice Information Center
858 South Court Street

BCS Reports: The Juvenile Justice System in California: An Overview

This report focuses on the agencies which make up the juvenile justice system: police and sheriff's departments, probation departments, district attorneys' offices, juvenile courts, and the California Youth Authority. The functions of these agencies, how they interact, and the decisions they make about the juveniles in their charge are described. Included in this overview are statewide figures covering a period of eleven years. These data were obtained from annual statistical files maintained by the Bureau of Criminal Statistics and Special Services.

Citizen's Complaints Against Peace Officers

Each California law enforcement agency is required to establish a procedure to investigate citizens' complaints against the agency's law enforcement personnel. The number of complaints received is reported to the California Department of Justice. Data elements include non-criminal and criminal complaints. Numbers collected for each element include number reported, unfounded, and sustained. The data collected is published in the annual *Crime and Delinquency in California* publication.

Domestic Violence Related Calls for Assistance

As of January 1, 1986, the California legislature required statistical reports be submitted to identify the extent of domestic violence in California. Data elements will include the number of domestic violence related calls for assistance, and information on weapon use by weapon type. Weapon type will include firearm, knife or cutting instrument, other dangerous weapon, and personal weapons such as hands or feet. This data will be published in the annual *Crime and Delinquency in California* and *Criminal Justice Profile* publications.

Forum: Employment and Crime

This project studied the relationship between work and crime. Researchers used two large California databases to conduct the study. A sample of individuals was taken from four years (1956, 1958, 1960, and 1962) and their records were compared in the California Employment Development Department's Wage History File and the Department of Justice Automated Criminal Justice Statistical System. Findings concluded an existing relationship between work and crime.

Full-Time Law Enforcement Personnel Survey

This one-day survey report is used by both the California Department of Justice and the FBI to compile annual statewide and national statistics on the number of full-time sworn and civilian law enforcement employees. Data elements include full-time sworn officers (including Chief or Sheriff), full-time civilian employees, and total full-time law enforcement employees. Each data element is subdivided by sex and total employees. This data is published in *Crime and Delinquency in California* and *Criminal Justice Profile* publications.

Monograph: Conspicuous Depredation: Automobile Theft in Los Angeles, 1904-1987

This publication examines the historical development of the automobile in California and associated crime patterns in motor vehicle theft in the city of Los Angeles from 1904-1987. Automobile thefts are placed into perspective with comparisons to other offense categories such as burglary and robbery, city population, automobile registrations, and police personnel. The number and percent of automobiles stolen and recovered, the length of time between theft and recovery are also discussed. Demographic information on the age of both juvenile and adult arrestees is presented. An "Automobile Timeline: Facts and Firsts" is a unique feature in this publication.

Outlook: Adult Felony Arrest Dispositions in California, 1988

Statewide adult felony arrest dispositions are examined. In 1988, the changing patterns from 1984 to 1988 in sentences for violent crimes, property crimes, and drug law violations is examined. Personal characteristics of age, race/ethnic composition, and sex of convicted offenders were also examined as well as the point of final disposition (police, prosecutor, lower court, superior court) following the arrest event. The 1988 report is currently available. Every three years a more extensive publication on this subject is prepared.

COLORADO

Assessment of Community Corrections Regressions in Colorado

The SAC will study the characteristics of regressed/revoked offenders versus those who succeed and will identify what, if any, placement preparation is provided and what opportunities and incentives can be implemented to increase program completion rates. A training package will be developed for Colorado community corrections boards. This study is funded by a National Institute of Corrections grant.

Colorado Criminal Justice Commission

Effective July 1, 1989, the Division was legislatively mandated to staff the newly created 20-member Colorado Criminal Justice Commission. To address current Commission priorities of statewide sentencing laws and prison overcrowding, a working structure includes committees on (1) long-term sentencing options, (2) short-term sentencing options to relieve crowding, and (3) legislation review. The Division is responsible for staff support, provides training and resource materials, and conducts research and policy analysis.

Division of Criminal Justice Third Annual Conference: Recidivism, Surveillance, and Treatment

This was a one-day conference to which judges, district attorneys, public defenders, probation officers, community corrections directors and boards, parole officers, Department of Corrections administrators, college and University students, and citizen groups interested in recidivism and surveillance and treatment programs were invited. A broad national perspective on current correctional issues and trends leading to the focus on community options in a resource poor environment was presented by the keynote speaker. Brief presentations on recidivism in Colorado followed. The morning session ended with a workshop on "Surveillance and Treatment: Do They Complement or Constrain Each Other?" The afternoon program included four breakout panels: (1) "Substance Abuse," (2) "Electronic Monitoring," (3) "Sex Offender Treatment Practices," and (4) "Intensive Supervision Probation and Parole." The conference ended with a summation and closing remarks by the keynote speaker.

Recidivism and Risk Assessment Scale Validation

The SAC validated the Rand Selective Incapacitation and Iowa Risk Assessment Scales to assess their generalizability to Colorado with an emphasis on the use of risk assessments and, on the effect of missing data on predictive accuracy. The validation sample consisted of offenders released from prison and community corrections. Arrest records were checked for a two-year at-risk period. An outcome measure was constructed from the arrest data to assess their predictive accuracy.

Community Supervision Programs: Costs vs Public Safety

This activity will study community supervision programs, recidivism of offenders in the community, and the cost of public safety. Research objectives include constructing a risk profile on a 1986 cohort of offenders on parole, in community corrections, and on probation; estimating program specific recidivism rates; comparing risk level and recidivism within each program; estimating relative risk to the community represented by offenders between programs to estimate program incapacitation effect; estimating costs of over-incapacitation and under-incapacitation; and, contributing to a method for making decisions about offender placement that best services interests of public safety and use of public funds.

Task Force on Justice for Abused Children/ Follow-up Focus Group

The SAC provided staff support to the Governor's Task Force on Justice for Abused Children. The Task Force was asked to develop comprehensive solutions which ensure a systematic, interagency response to serious physical abuse and sexual abuse of children. The final report of the Task Force was published in February, 1989. The SAC provides staff support to the follow-up Focus Group which is charged with developing a plan to implement the changes recommended by the task force. A three year plan is being developed, including plans for information sharing among criminal, civil, and child care agencies.

Impact of Truth in Sentencing on Jail and Prison Population

This research provides decisionmakers with an analysis of the anticipated impact of determinate sentencing legislation on the jail and prison populations. Based on sentencing committee findings, three sets of sentencing assumptions are simulated.

(302) 736-4626

Prison/Jail Flow

This activity creates files of prison/jail flow data. Files are backloaded to January 1980. This system includes individual detained admissions, detained releases, jail admissions, jail releases, prison admissions, and prison releases. Fields have common names and can be merged into a master file to track individual state bureau ID numbers through the flow. This data is being developed as a database for the proposed jail/prison forecast.

Data Sources: Corrections Department

Room 500
Washington, DC 20005

Contact: Stephen E. Rickman
(202) 727-6554

Crime and Justice Report for the District of Columbia

The SAC report presents statistical charts and graphs that describe the activities and outcomes covering the different stages through which cases are processed. The data are presented in an order that parallels the actual flow of cases through the criminal justice system. *The Crime and Justice Report* is a complete statistical profile of the District's criminal justice system. The report compiles data from various agencies and information systems within the District's criminal justice system and tracks the flow of individuals through these agencies. Reported in the book are five year trend data, when possible, to facilitate meaningful analysis.

Data Sources: Probation/Parole, Juvenile Information System, Corrections Department, Courts, Prosecutors, Police Departments, Pretrial Service Agency

PIMS Mapping

The Police Information Management System (PIMS) is an interactive network developed and operated by the Illinois Criminal Justice Information Authority (ICJIA) for the on-line storage and retrieval of police record information. One of the features of PIMS is the capacity to map address related data (e.g., incident reports) stored in the database. This constitutes a significant enhancement of police analytical and tactical tools and could facilitate more strategic deployment of police resources.

INDIANA

Analyzing School Drug-Incident Data

In January of 1989, legislation was enacted requiring public school corporations to report information to the state about drug incidents occurring within 1,000 feet of school grounds. Since then, over 700 incidents involving the possession, consumption, or dealing of alcohol and drugs have been reported by Indiana school officials. The Center is analyzing data from these reports to learn more about the prevalence of drugs in Indiana schools and the

types of disciplinary actions being recommended by school authorities for various drug incidents.

Development of Incident-Based Reporting (IBR) in Indiana

During 1988, the Indiana Criminal Justice Institute received a two-year grant to implement an incident-based crime reporting system in the state. The Center is managing the project. A policy advisory board was formed to provide advice and guidance to the Institute and Center. Committees are being formed to determine which data elements will be included in the IBR system to develop software for managing and reporting IBR data, and to organize IBR training for law enforcement officers and reporting agencies.

Evaluations of Projects Funded under the Federal Anti-Drug Abuse Program

During 1987-1988, Indiana used Anti-Drug Abuse funds to support apprehension, crime lab enhancement, rehabilitation and treatment, and other projects throughout its criminal justice system. The Center for Criminal Justice Research and Information is coordinating formal evaluations of three of these projects: 1) two multi-jurisdictional drug task forces with different organizational and management structures, 2) an intensive supervision probation project for nonviolent drug offenders, and 3) a computer-assisted substance abuse identification and treatment project being implemented in the Department of Corrections. The task force evaluation report is available. The intensive supervision probation evaluation report will be available in the fall.

Identifying Criminal Justice Practitioner Research Needs

The Center continues to document the research and training needs of criminal justice practitioners in the state. This effort provides a basis for identifying critical research needs and formulating budget appropriation requests to the legislature. It also helps coordinate resources to meet the research needs of other criminal justice agencies. Departing from the mail survey approach tried in 1988, the Center is conducting in-depth interviews with key actors in criminal justice agencies in the state to do an inventory and prepare summary descriptions of research problems and needs. These descriptions will be used to periodically produce a report on criminal justice research needs in the state.

Micro-Computer Seminar and Resource Directory for Law Enforcement

In cooperation with the Indiana Sheriff's Association and the Indiana Association of Chiefs of Police, the Center sponsored a two-day seminar on micro-computer technology for law enforcement and other criminal justice professionals. SEARCH Group, Inc. presented the seminar to about 70 participants from various parts of the state. The seminar was held in response to a survey of law enforcement computer needs that was conducted earlier in the year. The information from the survey was used to prepare a hardware and software resource

INDIANA-IOWA

directory that was distributed to law enforcement agencies throughout the state. The survey, seminar, and directory were designed to support planning for the development of a state-wide incident-based reporting system.

Participation in National Drug Consortium

Data gathered in the project is helping Indiana gain a better understanding of drug problems within its boundaries and develop strategies for dealing with these problems. Quarterly data for 1986, 1987, 1988 and the first two quarters of 1989 are available for crime labs. Quarterly operations data are available for 1988 and the first two quarters of 1989 for Indiana's multi-jurisdictional drug task forces operating in the state during 1988. The report is based on the quarterly data and a survey of task force directors conducted in the fall of 1989.

Planning for Information Systems Development in the Department of Correction

The staff of the Center provided technical assistance to the Information Management Systems Division in its efforts to prepare a long-range information system plan for the Department of Correction (DOC). A series of three structured brainstorming sessions were held with DOC upper management personnel to identify and rank priority information needs in twelve functional areas. In addition, in-depth interviews were conducted with groups of DOC personnel representing each of the twelve functional areas. The long-range plan, based on the

results of brainstorming sessions and interviews, is now being prepared. It will serve as a blueprint for the development of information systems in DOC over the next five years.

Preparing Drug Data Compendium

The Center is preparing a compendium of information on data pertaining to drug activity, enforcement, and treatment in Indiana. Relying primarily on secondary data sources, the compendium will display trends in drug activity over the last several years. It will also provide summary information about the source of the data elements for which data are available and methodological limitations of the data. The compendium is intended to support the efforts of the Governor's Commission For a Drug Free Indiana to assess the scope of the problem in the state and develop strategies for dealing with it.

Tracking Juveniles Released from Indiana Boys' School

At the request of the Task Force on Juvenile Institutions, the Center is conducting a study on juveniles released from the Indiana Boys' School (IBS). The primary purpose of the study is to determine the extent to which juveniles released from the IBS recidivate as measured by their subsequent incarceration in the juvenile or adult correctional systems of the state. Another purpose is to provide members of the task force with summary information about juveniles incarcerated at the IBS and the types of programming they have received while incarcerated. The study involves gathering demographic, social history, criminal history, and programming data for a sample of 382 juveniles released from the IBS over the last five years

and tracking their subsequent contact with the Corrections Department.

Felony Sentencing Study

The felony sentencing study is a detailed analysis of 5,000 cases (randomly selected-stratified by judicial district) giving rise to felony sentences in 1987. Data was collected from original (primary) sources and cross checked against state databases. The data collected on each case include: specific behavior descriptions, type and level of victim harm, specific victim and offender characteristics, drug/alcohol abuse history, weapon use (what weapon, how used, by whom), and a detailed record of the criminal justice processing decisions from arrest to sentencing. This information will be used in the development of sentencing guidelines, in conducting policy analysis on proposed changes to criminal justice law or policy, and to evaluate current state criminal justice policies.

JJDP Compliance Monitoring

Data is analyzed from three independent, cross validating sources in order to monitor the state's compliance with the separation, jail removal, and deinstitutionalization mandates of the JJDP Act. This information, coupled with annual onsite inspections and interviews, is used to prepare the compliance reports required by OJJDP. The information is further analyzed with policy recommendations made to local officials as to how the state may better meet the requirements of the JJDP Act.

Local Criminal Justice Information Systems Program

Technical assistance is offered to local criminal justice departments in the areas of information systems requirements, feasibility studies, bid specifications and review, implementation, and on-going systems planning. Also, training is provided through major state organizations (Sheriff, District Attorney, Chiefs of Police). Finally, the SAC staff operates a software clearinghouse for local justice agencies. They serve on information systems committees for the Sheriff and District Attorney.

Louisiana Incident-Based Uniform Crime Reporting System

The SAC began work on the pilot implementation of an enhanced incident-based Uniform Crime Reporting System in November 1989. The purpose of the pilot project is to develop the software and infrastructure necessary for statewide implementation, and to document the utility of the system for local, state, and Federal level policymakers. Initial plans call for interfacing the IBR system with the SAC's various policy simulation models in order to improve the reliability and validity of the policy impact statements currently utilized by the Governor and the legislature in considering changes to criminal justice law and policy.

MISSOURI

Anti-Drug Abuse Act Narcotic Control Program Support Services

The SAC provides information and research support services to the Missouri Department of Public Safety in administering the Narcotic Control Program under the Anti-Drug Abuse Act of 1986. The SAC will continue to work with other state and Federal agencies to collect and interpret data that will provide Missouri public officials with a better assessment of Missouri's drug problems as well as assist in promoting the development of effective policies and programs designed to address these problems. The SAC is developing a publication entitled *Missouri's Illicit Drug Problem*. This publication will provide an assessment of the illicit drug problems facing the state as well as describe the Missouri criminal justice system's response to the problem.

Missouri Crime and Arrest Digest

This digest contains information on crime index offenses committed in the state over a ten year period. Law enforcement arrest levels are also provided. This Digest is disseminated to over 600 Federal, state, and local criminal justice authorities and public officials. Annually, the FBI provides UCR databases on Missouri law enforcement crime and arrest reported activity to the SAC. These databases are reconfigured into analytical subsets and used to develop this report.

MISSOURI-MISSOURI

Missouri Driving While Intoxicated (DWI) Case Tracking Project

The SAC conducted a tracking study of drunk driving offenders. A sample of 870 offenders was traced from arrest through the criminal justice system. In addition, all administrative sanctions against these individuals were examined. Data collection occurred during 1985 and 1986. Interpretive data analysis and publication of findings occurred in 1988/1989. Two major publications were produced as a result of this study. These were: (1) A Study of the Processing of DWI Arrests in Missouri and (2) A Time Analysis of Missouri DWI Arrest Case Processing.

MULES Missing Person Project

The SAC developed a program to retrieve data from Missouri's MULES system on all missing persons reported to law enforcement agencies. These data were used for an empirical analysis of all missing persons cases that were in the MULES system in 1984, and a report on findings was published. Programs were developed to produce monthly and annual missing person and children reports on a continuous basis, and are being provided to the Missouri State Highway Patrol's Missing Children's Unit. The SAC is currently producing a second report on Missouri's missing person cases that were active in the MULES system from 1985 through 1988.

NEW HAMPSHIRE

Comprehensive Crime Control Act of 1984 and Anti-Drug Abuse Acts of 1986 and 1988

The New Hampshire SAC has been assisting the Office of the Attorney General in implementing the Comprehensive Crime Control Act of 1984 and the Anti-Drug Abuse Acts of 1986 and 1988. The governor designated the Office of Attorney General as the responsible agency for administering these programs. Federal funds from BJA and the Office of Victims of Crime are made available to selected subgrantees whose activities have the greatest impact in the crime prone areas of New Hampshire.

NEW MEXICO

Child Homicide Study

In an attempt to overcome a lack of systematic, reliable data in the study of child abuse, the New Mexico SAC is studying child homicide rates. The three main sources of data used by the SAC are 1) police, 2) courts, and 3) the coroner's office. The SAC is studying all cases of child homicide involving victims less than 16 years old over a ten year period. Homicide data is being examined with the purpose of identifying groups of children that are especially at risk of child abuse and homicide.

Statewide Survey on Reactions to Crime in New Mexico

A survey of citizens' attitudes toward the problem of crime in their neighborhoods and their reactions to being victims was conducted in

July 1989 using random digit-dialing telephone interview procedures. A total of 536 New Mexico residents completed the interview. Included in the survey were questions on fear of crime, levels of community participation, and perceptions of police performance. A key aspect of the survey involved presenting respondents with descriptions of problem situations (including crimes) which might occur in their neighborhoods and asking them to rate the seriousness of these situations and indicate what kind of action they would take in response to them (e.g., talk to neighbors, call the police). Data processing is in progress and results will provide information on such issues as fear of crime, police/community relations, and the role of self-help and community activities in coping with crime. A report is now available.

Drug Related Homicide Studies

The SAC is currently conducting three research projects to collect information on the relationship between drugs and homicide. The first is an NIJ funded study using offender interviews to study the issue, the second study uses data collected from police departments during active investigations of homicides in New York City, and the third study involves using criminal history information to analyze drug related homicide data to examine the relationship between prior criminal history and the cause of committing homicide.

Incidence and Characteristics of Rape in New York State and the Nation

The report summarizes the characteristics of rape incidents using 1988 UCR and 1987 NCS data for New York State and the United States. It is designed to present the findings of available published crime data on rape in terms easily understood by the general public. It was produced to assist the Governor's Task Force on Rape and Sexual Assault in their efforts to improve public understanding of rape.

Data Sources: UCR/IBR, BJS National Crime Survey

Report on Victims of Consumer Fraud

The Attorney General's Consumer Fraud Division automated file system is accessed for data on victims of consumer fraud. One premise is that in North Dakota, elderly persons are more often victimized by this offense than by any other.

State UCR Program

The SAC maintains the UCR program in the state. An annual report is prepared summarizing crime data for North Dakota. In April 1988, the state began to convert to an incident-based reporting system. It is anticipated that 90 percent of the participating law enforcement agencies will be using a standard state-supplied incident report form by December 1990, and that approximately one-third of reporting agencies will be transferring data via electronic media.

Law Enforcement Training System

This system maintains training and law enforcement employment records for approximately some 1,500 officers across the state. It monitors compliance with licensing requirements, and documents the attendance at certified training programs. Officers must attend 48 hours of certified law enforcement training every three years, and must satisfactorily complete an annual sidearm certification course in order to maintain a peace officer license. The system has been designed to notify officers of possible shortfalls in training time and of delinquencies in reviewing licenses.

Using Microcomputers for Narcotic Investigations

The SAC sponsored training in using microcomputer to do narcotic investigations for Oklahoma Bureau of Narcotics agents. This training was provided by the Long Beach Police Department and Bureau of Justice Assistance. Training was also provided for SAC staff to provide technical assistance to OBN in this area.

Evaluation of the "Preparing for the Drug (Free) Years" Program—1989

This evaluation research project involves the use of a quasi-experimental design (a single group, pretest-posttest design) to assess the achievement of short-term objectives identified with the program. The goal of this program is to reduce the risk factors associated with adolescent alcohol and drug use/abuse by exposing parents to a five-session series of workshops designed to promote family bonding and communications and knowledge of techniques to deal with adolescent problems and factors related to adolescent drug use and abuse. The workshops were held in 32 Oregon

counties and within four State of Oregon social service agencies. Altogether, 3402 parents participated in 195 workshops during the Spring of 1989.

VERMONT

Annual Law Enforcement Profile

This project, conducted in conjunction with the Chiefs of Police Association of Vermont, is an annual effort to compile management and administrative law enforcement data on municipal police departments in Vermont. While there will be some variation in the topics addressed from year to year, surveys will generally address issues such as salaries and benefits, department budgets and personnel resources, equipment, attrition, and the like.

Data Sources: Police Departments, Survey

Date of Completion: Continuing Activity

Agency: Vermont Criminal Justice Center
State Office Building
Montpelier, VT 05602

Contact: Paul Stageberg
(802) 828-3897

Justice System Modeling

The Center will be examining data collection and information flow through the justice system to identify the nature and extent of data currently available through normal system processes. The intention is to better identify how offenders are processed through the justice system, permitting analyses of how changes in one portion of the system might affect operation and caseload at another. Ideally, a computer model of the system will be developed.

VIRGINIA

Annual Report on Crime Patterns and Trends

The SAC publishes a crime trends report which outlines patterns of criminal incidents, arrests, and convictions/sentencing in Virginia. The study also compares Virginia crime patterns with geographically contiguous states as well as with nationwide patterns and trends. Last year's report focused on violent crime in Virginia and won CJSA's Phillip Hoke Award for Excellence in Analysis.

SAC PUBLICATIONS

The following pages of the *Directory* provide a listing, alphabetically by state, of reports published by the Statistical Analysis Centers between January 1989 and July 1990. This listing of SAC publications is a recent addition to the *CJSA Directory of Criminal Justice Issues in the States*. For the last six years, those needing criminal justice information have been able to refer to the *Directory* for descriptions of current research and analysis activities of the SACs. This section of the *Directory* provides information on the final products of these activities.

If you would like more information about a publication, use Appendix 1 of the *Directory* to contact the SAC which issued it.

APPENDIX 2

THE CRIMINAL JUSTICE STATISTICS ASSOCIATION

THE ORGANIZATION. . .

is a professional association of criminal justice analysts committed to providing accurate and timely information in support of sound policy development. It has over 180 members nationwide. CJSA's goals are to: 1) expand the analytical capabilities of state statistical agencies; 2) encourage cooperation among the states in addressing common policy-related problems; 3) promote the exchange of information and technology within the criminal justice community; and 4) facilitate liaison between the states and the Federal government. CJSA was organized by the states in 1974 as a private, non-profit organization. Funding is provided by grants, contracts, and membership dues. CJSA works closely with the U.S. Justice Department's Bureau of Justice Statistics and other Federal agencies to promote the effective use of criminal justice information and professional standards for analysts.

MEMBERSHIP. . .

is a national network of professionals representing every aspect of criminal justice operations and analysis. Representatives from state statistical agencies guide and set policy for the Association. Located in almost every state, these agencies—Statistical Analysis Centers (SACs)—conduct objective analyses to meet critical planning needs and address statewide and systemwide policy issues. Information contributing to viable, effective policy development is made available to decisionmakers through SAC statistical services, research, evaluation, and policy analysis. Originating as a professional association of SAC directors, a general membership now includes police, court, and juvenile planners; corrections researchers; and legislative analysts. These members enhance the SAC network and encourage a systemic approach to criminal justice problem solving.

THE SERVICES. . .

involve five program areas:

The Center for Decision Support is a division of the Association which provides training programs, technical assistance, and decision support tools to state and local policy analysts. Major activities include—

- **IMPACT**, a criminal justice population projections software package for the personal computer. IMPACT can run using any of four major projection methodologies. It allows users to evaluate the potential impact of legislative, policy, and demographic changes on criminal justice populations.
- **The Decision Support Users Group**. This professional network facilitates information exchange among IMPACT users and other criminal justice analysts involved in projections. It also provides a forum for communicating user needs to IMPACT development staff. Members receive training in the methodological, programmatic, and political issues involved in conducting projections.

The National Criminal Justice Computer Laboratory and Training Center—Washington, DC is operated by the Association's staff with partial funding from the Bureau of Justice Assistance. The Center provides hands-on training in microcomputer-based software for statistical, graphics, and operational applications. The Computer Center conducts demonstrations of public domain and private sector software and provides objective evaluations of computer products to assist criminal justice agencies in their purchasing decisions. These services are directed at police, court, prosecutor, corrections,

research, and planning officials in agencies at all levels of government.

Research and Evaluation efforts by CJSA presently focus on a national assessment of statewide drug control strategies. Funded by the Bureau of Justice Assistance, CJSA is coordinating the Consortium for Drug Strategy Impact Evaluations to collect data series on law enforcement drug control activities, and analyze indicators of drug use and abuse. The Consortium serves as the vehicle by which technical assistance and data development funds are disseminated, based primarily on states' needs. The project's results will be used to inform future funding decisions by Congress and the Department of Justice in the area of drug enforcement.

Clearinghouse of State Policy Resources is maintained by the Association. This on-line index, called the Computerized Index to Data Sources (CIDS), allows CJSA to identify state information which addresses a variety of policy issues. CIDS contains information on state policy research, published reports on crime and justice, and characteristics of research data sets. Many policy questions are answered with CIDS: What states are studying domestic violence, the impact of sentencing changes, or recidivism? What are the major policy issues in the states? What states have data on criminal histories, dispositions, parole? Requests for information are filled free of charge.

Professional Development is furthered through small group workshops and annual conferences. Members of the Association meet to address major policy issues and learn state-of-the-art statistical methods and computer technology. Several conferences and workshops we have offered addressed:

- drug control policy
- exploratory data analysis
- policy-oriented projection techniques
- presentation of data to policymakers
- prison and jail overcrowding
- risk assessment

THE PUBLICATIONS. . .

focus on state activity in criminal justice.

The Forum is the Association's newsletter and reports on current policy analysis in the states, applied techniques, legislative issues, and members' activities. The newsletter features the latest developments in microcomputer software and hardware. The FORUM highlights research methods and tested solutions used to address criminal justice problems. The FORUM is free to members or may be ordered independently.

The Trendsetter is published semi-annually and circulated among members of the Decision Support Users Group. Analysts working in criminal justice modeling and projections will find this newsletter especially useful since it addresses research, software, and other developments in the area of decision support.

The Briefing is sent to the CJSA membership on an ad hoc basis. This one-page bulletin reports on the latest developments concerning national criminal justice issues, legislation, and Association matters.

The Directory of Criminal Justice Issues in the States is a directory of criminal justice programs and policy research conducted by the SACs. The activities are listed by state and indexed by issue

area. Published annually, *The Directory* is a handy reference to state initiatives in criminal justice and is the only compilation of its kind.

OBTS: A Foundation for Decision Support was developed by CJSA as a slide show presentation in 1986. The presentation describes the Offender-Based Transaction Statistical System and its usefulness in formulating policy. It is targeted at key people in the state decision-making process to promote the implementation and use of OBTS. The presentation is available to the public in a video format through the SACs.

FOR FURTHER INFORMATION. . .

The most comprehensive State policy resource available

Computerized Index to Data Sources

Do you need access to recent applied research and statistics in the States?

The Computerized index to Data Sources (CIDS) is your solution. This innovation resource developed by the Criminal Justice Statistics Association/Bureau of Justice Statistics contains information on—

- policy research conducted in 48 states
- published reports on crime and justice from 31 states
- characteristics of research data sets maintained in 33 states

The information contained in CIDS is collected from State Statistical Analysis Centers.

Responding to information requests

- What are the major policy issues in the states?
- What states are studying the impact of sentencing changes, domestic violence, or recidivism?
- What states have data on criminal histories, dispositions, parole?

CIDS provides these answers and more.

Conducting custom searches of the database

CJSA can search the CIDS database and provide a summary report to answer specific requests. CJSA can narrow a search by selecting predefined criteria or simply search for words in the text.

Access

Call CJSA with your request. This service is provided free of charge.

Call or write for more information:
Criminal Justice Statistics Association
Suite 606
444 N. Capitol Street, N.W.
Washington, DC 20001

A software package to help analysts and decisionmakers project the effects of policy changes on criminal justice populations

IMPACT

CJSA's Center for Decision Support is pleased to introduce you to **IMPACT**, a user-friendly software package for use with IBM pc's and all compatible microcomputers. This package is an easy-to-use, flexible, menu-driven tool that will allow you to forecast the flow of offenders through your criminal justice system.

"Our legislature just passed a mandatory sentencing law. What will be the impact on our future prison population?"

"How will new probation criteria for first-time offenders affect my workload as a probation officer?"

"What will be the effect on jail population of our new diversion to treatment program for drunk driving offenders?"

IMPACT can help you answer questions like these. Whether you work for a department of corrections, a legislative committee, a budget office, or some other planning or research department, you will find this software useful for projecting and comparing "what if" scenarios. For example, "what if" drug arrests increase twenty percent next year? What if the increase is forty percent? What would happen to the court dockets in each of these cases? With **IMPACT** you can find out.

Used in the Field

IMPACT is used by more than 40 state and local agencies to assess the potential effects of demographic changes, changing incarceration rates, new sentencing legislation, and other factors on criminal justice populations.

A Wide Range of Applications

IMPACT can play a major role in the forecasting of prison or jail populations, but that is not its only use! This software can assist you in performing projections in many criminal justice arenas, such as:

- court caseloads
- probation caseloads
- probation populations
- parole caseloads
- crime patterns
- police workloads

More Than Just Software

Along with the software you will receive a detailed *IMPACT Users' Guide*, which includes information on how to design and run a projection, two complete examples, and explanations of all methodologies included in the package. In addition, for one full year you will receive unlimited telephone support from CJSA—not just on **IMPACT**, but concerning any questions you might have about projections design or methodology. Also included in the price of the software is a one year subscription to *Trendsetter*, a biannual publication which focuses on the latest in the field of forecasting and projections.

When you order you will also join the network of **IMPACT** users, who have many years of experience in projections research and analysis. Through CJSA's Center for Decision Support, these users receive and exchange information on developments in the field, and offer advice concerning the building and maintenance of projections programs.

Cost:

CJSA members—\$700
non-profit organizations \$900
for profit organizations \$1800

For more information, or to order IMPACT, contact:
