## ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for JUVENILE DETENTION AND CORRECTIONAL FACILITY CENSUS, 1979 were originally collected by the Bureau of Justice Statistics. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

## STUDY DESCRIPTION

The Juvenile Detention and Correctional Facility Census of 1979 was the sixth in a series of surveys of state and local public facilities in the juvenile justice system. The first of these major surveys was designed by the Law Enforcement Assistance Administration (LEAA) and the Department of Health, Education and Welfare (HEW). The data collection for the six surveys was collected by the Bureau of the Census.

The census surveyed the number and kinds of juvenile detention facilities with a resident population of at least 50 percent juveniles. (This last criterion did not apply to facilities that held youthful offenders in addition to juveniles. A facility was included if it was considered a juvenile facility, even though the youthful offenders outnumbered juveniles at the time of the census. Specifically excluded were juvenile detention centers operated as part of a jail and without a separate staff or budget, nonresidential facilities, facilities exclusively for drug abusers or for dependent and neglected children, foster homes and federal juvenile correctional facilities.

Included in the survey are the total number of juveniles held as of December 31, 1979 as well as the breakdown of the numbers in each type of facility. Also included are numbers and breakdown by sex and race of the residential population. The amount of movement into and out of the facility is included with a breakdown by sex and type (juvenile or adult). The number of total staff is given for each facility and is broken down into several categories; Payroll, non-payroll, community volunteers, full-time, part-time, type of work done, and race. The expenditures for the facility are also included in the dataset.

## DATA COLLECTION PROCEDURES

The 1979 census was conducted by mail. The questionnaires were sent to central reporters (state/local agencies). The remaining questionnaires were mailed directly to the individual facilities.

The mailing list used in the 1979 census was an updated version of the one used for the 1977 census. The updated list was sent to juvenile correctional authorities in the respective states for review and correction. The 1979 survey had a 100% response rate.

FILE STRUCTURE

Juvenile Detention and Correctional Facility Census, 1979 data are available from the ICPSR in two formats: a card-image file and an OSIRIS dataset. The card-image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by facility with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case. There are 238 variables on 1,015 cases.

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

ICPSR PROCESSING INFORMATION

The study was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to OSIRIS missing data values. No consistency checks were performed. Statements bracketed in "[" and "]" signs in the body of the codebook were added by the processors for explanatory purposes.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

[1] VAR 0006 [2] LEVEL OF GOVERNMENT [3] MD= GE 9  
REF 0006 [4] LOC 13 WIDTH 1 [5] DK COL  
[6] IMP DEC=d

[7] Level of government administering facility

[8]

[9] SEE NOTE(S) X

[10] Actual number is coded.

[11] [12]

- 0. State government
- 1. County government
- 2. City government

9. NA

[1] Indicates the variable and reference numbers. A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck), the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.

- [2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.
- [3] Indicates the code values of missing data. In this example, code values greater than or equal to 9 are missing data (MD = GE 9). Alternative statements for other variables are "MD=0 OR GE 9," "MD=9," or "NO MISSING DATA CODES." Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the sequential location and width of this variable within the record when the data are stored on magnetic tape. In this example the variable named "LEVEL OF GOVERNMENT" is 1 column(s) wide and is located in the 13th column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are stored on cards or in card-image format (80-column format)
- [6] A variable containing data with implied decimals is denoted by the message "IMP DEC= d," where dd is the number of decimal places implied in the variable.
- [7] This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [8] Indicates an additional comment or explanation appended to the variable description.
- [9] A variable which has a footnote associated with it is denoted by the message, "SEE NOTE(S) X" where "X" is the number of the footnote referenced.

- [10] "Actual number is coded." appears in the codebook to indicate that the variable has been declared continuous.
- [11] Indicates the code values occurring in the data for this variable.
- [12] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Do Not Know), "NA" (Not Ascertained), and "INAP" (Inappropriate).

VAR 0027	ADULTS HELD ?		MD=GE	9
REF 0027	LOC 56 WIDTH 1	DK 1	COL 58	

DEFINITIONS

JUVENILE - A person subject to the exercise of juvenile court jurisdiction limitations as defined by State law.

For the purposes of this report, a person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law.

For the purposes of this report, a person of juvenile age is still considered a juvenile even though tried as an adult in criminal court.

YOUTHFUL OFFENDER - A person adjudicated in criminal court, who may be above the statutory age limit for juveniles but below a specified upper age limit and for whom special correctional commitments and special record-sealing procedures are made available by statute.

For purposes of this report, persons covered under state youthful offender statutes should be considered adults.

ADULT CRIMINAL OFFENDER - A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

COMMITTED OR COMMITMENT - Refers to placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement".

DETAINED OR DETENTION - Refers to juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Include those juveniles undergoing diagnosis or classification before disposition or placement.

(CONTINUED)

Q. III(A) At any time during the annual period covered by this report, did the facility hold any persons who were admitted to the facility as adult criminal offenders, as defined by the laws of your State?
